

Abhishek Shah

+91 8401508817 | iamshah119@gmail.com | Bengaluru, Karnataka | linkedin.com/in/iamnow

Profile

- Results-driven Frontend Developer with 4.3+ years of experience in building dynamic, responsive mobile & webapps. Proficient in HTML, CSS, JavaScript, TypeScript, and modern frameworks/libraries like React, Redux, Angular, NgRx, Node.js, Express, along with exposure to GenAI.

Education

Master of Computer Application (MCA) , Kadi Sarva Vishwavidhyalay	2021 – 2023 Gandhinagar
Bachelor of computer application (BCA) , Kadi Sarva Vishwavidhyalay	2017 – 2020 Gandhinagar

Skills & Technologies

Frontend & Backend Technologies:

- ReactJs, Angular, TypeScript, MongoDB, Express.js, JavaScript (ES6+), Redux, NgRx HTML5, CSS3, SCSS

API Integration

- RESTful API integration, secure data handling

CI/CD & Deployment

- Jenkins (build, integration, deployment pipelines)

Performance Optimization

- Chrome DevTools, Lazy loading, code splitting, on-demand resource loading,

Version Control

- Git, GitHub (branching strategies, code reviews)

Collaboration

- Agile methodologies (scrum, sprint planning, retrospectives), working with backend teams, product teams

Experience

AGS Health Apr 2025 – Present

Key Projects: AGS Core Products (CAC, CAPC, Standalone, Codebook)

- Developed and maintained scalable, responsive web applications using ReactJS, TypeScript, HTML5, CSS3, and SCSS, delivering high-performance features across AGS's flagship products.
- Integrated and consumed RESTful APIs to ensure secure, efficient communication between frontend and backend services.
- Built and maintained modular, reusable React components, contributing to the internal design system to promote UI consistency and developer efficiency across teams.
- Collaborated closely with backend engineers, UI/UX designers, and product managers to deliver intuitive user experiences aligned with complex business logic and healthcare workflows.
- Implemented performance optimizations such as lazy loading, code splitting, and dynamic imports, improving load times and overall application responsiveness.
- Used tools like Chrome DevTools, Lighthouse, and other profiling tools to monitor, analyze, and enhance application performance for large-scale enterprise use.
- Contributed to CI/CD pipelines via Jenkins, ensuring fast, reliable deployment and release cycles.
- Managed codebase using Git/GitHub, following robust branching strategies, participating in code reviews, and ensuring code quality through version control best practices.

Tata Consultancy Services Jun 2021 – Apr 2025

- Worked on large-scale enterprise projects focused on dynamic module creation and continuous integration within a structured delivery environment.
- Designed and developed modular, scalable, well-tested, and optimized components that adhere to high enterprise architectural standards.
- Built highly dynamic modules and screens driven entirely by user-defined configurations, enabling flexible workflows without requiring code changes.
- Implemented and maintained CI/CD pipelines to automate build, test, and deployment processes, ensuring faster and more reliable releases.
- Ensured application quality and stability through unit testing, code reviews, and defect triaging across multiple releases.
- Collaborated closely with cross-functional teams including QA, business analysts, and DevOps to deliver enterprise-grade solutions.
- Created and maintained technical documentation and supported knowledge transfer activities to ensure long-term system stability and team continuity.

Awards

Xcelerate warrior Certificate (TCS)

- I have led and supported the team in delivering great work on time.

Certificate of Appreciation (TCS)

- I have been significant part of the team and have received an award for my commitment and dedication to delivering great work.
